Displacement, disease and malnutrition threaten lives

3.9 million
 People facing crisis and emergency food insecurity

675,400
 Moderately Acutely Malnourished

235,000
 Severely Acutely Malnourished

Eight months into the current conflict the situation in South Sudan continued to deteriorate. The rainy season is underway increasing the risk of diseases, including cholera. Hunger and malnutrition are also on the rise with millions of people facing emergency levels of food insecurity. Over 1.5 million people have been displaced from their homes.
